

YEGOTI SAI THANUSH KUMAR

+91 9182248301 | yegotisaithanushkumar143@gmail.com | Visakhapatnam, Andhra Pradesh |
saithanushkumarportfolio2.netlify.app

PROFESSIONAL SUMMARY

Electronics and Communication Engineering student with expertise in IoT, AI-powered automation, workflow orchestration, and software development. Experienced in building intelligent systems using n8n, APIs, webhooks, cloud platforms, WhatsApp Business integrations, and AI models. Passionate about emerging technologies including Edge Intelligence, Digital Twins, and next-generation communication systems. Demonstrates strong analytical, problem-solving, and project execution skills with a commitment to developing innovative, scalable, and impactful technology solutions.

EDUCATION

B.Tech – Internet of Things (IoT) : Seshadri Rao Gudlavalleru Engineering College 2023 – 2027 | CGPA: 8.81
Intermediate (MPC) : Narayana Junior College, Visakhapatnam 2021 – 2023 | 94%
SSC : Holy Cross School, Seethanagaram 2021 | 99%

TECHNICAL SKILLS

Languages: Python, C, JavaScript, HTML/CSS **AI/ML:** TensorFlow, YOLOv8, ByteTrack, Computer Vision, Prompt Engineering
Automation: n8n, API Orchestration, Slack/Google/Email Integrations **Web Dev:** Full Stack Web Development, Netlify Deployment
Tools & Platforms: Git, EDA Tools, FPGA, Verilog HDL, VLSI Design, IoT Systems

PROJECTS

Smart Pilgrimage Management System | SIH 2025 – Shortlisted 2025
• Shortlisted in Smart India Hackathon under MoE's Innovation Cell.
• Built AI + IoT crowd & queue management using YOLOv8, ByteTrack, real-time dashboards, and AI-based predictions for pilgrimage centers.

BankEye 360 – AI-IoT Security System | MSME Innovative Project Scheme 2024–25
• Developed an AI-IoT threat detection and emergency lockdown platform for MSME banks, ATMs, and NBFCs.
• Integrated Computer Vision-based surveillance with automated alert and response workflows.

KurukshetraMind – Mahabharata Wisdom System | Full Stack Web App 2024
• Engineered an AI-powered decision support platform offering philosophical guidance based on Mahabharata scenarios.
• Deployed live at kurukshetramind.netlify.app using modern full-stack web technologies.

NAINA AI Assistant – Intelligent Automation Agent | n8n + Multi-API Integration 2024
• Built a conversational AI automation agent integrating Slack, Google APIs, calendar, and email services via n8n.
• Designed multi-step workflows for real-time task automation, scheduling, reminders, and event management.

Chronic Disease Forecasting System | ML Project 2024
• Developed a predictive ML model for early detection of chronic diseases using classification algorithms and patient data analysis.

INTERNSHIP

VLSI Design Intern | Skill Dzure 2024
• Worked on digital logic design, Verilog HDL, and FPGA-based implementation using EDA tools for simulation and synthesis.
• Built small-scale projects demonstrating circuit optimization, design verification, and hardware design principles.

LEADERSHIP & EXTRACURRICULARS

President – PATRIOT (IoT Student Association) | SRGEC Apr 2026 – Present
• Leading the primary student body of the IoT department; organizing technical events, workshops, and innovation activities.

Vice President – IETE Student Forum | SRGEC Mar 2025 – Mar 2026
• Led technical workshops, peer learning programs, and strengthened the forum's collaborative and innovation-driven presence.

AI/ML Team Member – GDSC | SRGEC Dec 2024 – Sep 2025
• Collaborated on AI/ML initiatives, automation projects, and emerging technology learning sessions.

CERTIFICATIONS & TRAINING

TensorFlow 7-Day Bootcamp (Machine Learning Fundamentals) | Quantitative Aptitude & Logical Reasoning (Self-developed) |
VLSI & FPGA Design (Skill Dzure, 2024)
